**Re: To Whom It May Concern**

It is with pleasure to thank you for the energy saving work to supply & install V-KOOL Spectrally Selective Solar Control Window Film to our Wellcome Supermarket at Tin Hau.

V-KOOL film can actually minimizes the Solar Heat Gain through the glass windows to our store. Meanwhile, its maintains high visible light transmission character, it does not block our customer's view to the store.

I would be happy to recommend V-KOOL CONSULTANT (HK) LTD to anyone who is planning to undertake Electricity Cost Saving on the cooling load and minimize the Solar Heat Gain pass through the glass window into the building.

Your Sincerely,

  
.....  
**Ricky Poon**
